

# Participants Needed

Understanding Ruling Relations of Care in Eating Disorder Treatment in Ontario to Enhance System Transformation

## ELIGIBILITY:

- You are a dietician, social worker, therapist, psychologist, nurse, or other registered professional.
- You have a specialization in eating disorders.
- You have experience working in specialized inpatient, day patient, and/or residential eating disorder treatment in Ontario within the past 5 years.

## OVERVIEW:

I am seeking service providers with experience in intensive eating disorder treatment in Ontario to participate in a 60 to 90-minute interview to explore your practices of providing care to patients.

By exploring your practices of care in treatment, I am seeking to explicate the social relations that govern your acts of care. The goal is to understand where tensions and alignments between actual practice of care and treatment guidelines and the governing discourses/ideologies exist to explore where we can promote transformation in programs.
